

Liaison 1-2

SECRET

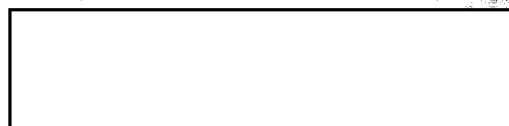

22 DEC 1964

This request to General Carroll to eliminate further production of the photo-map and concentrate on the Secret version is based on our conviction that the latter version can be distributed to more potential users and serve a greater variety of intelligence needs than with a saving in man hours and reduced production time.

This proposed change in the joint AMS-CIA program has been discussed thoroughly with AMS officials, who wholeheartedly approve, and they in turn have the support of the Office of the Chief of Engineers. The AMS Department of Engineers, Special Projects Activities (DESPA) has requested that the program modification be placed officially before the DIA because of the role of the Mapping, Charting and Geodesy component of DIA in program planning and budget approval of AMS mapping activities.
